EDUCATION

Sardar Patel Institute of Technology   Mumbai, India
Bachelors of Technology in Electronics and Telecommunications   ***2021 - 2025***

EXPERIENCE

Software Developer Intern   March 2024 – May 2024
OmnisynkAI   *Remote*

- Successfully migrated **Webflow** website components to **Next.js**, ensuring enhanced integration and improved functionality, thereby delivering a seamless user experience.
- Played a key role in the ongoing development of a **website builder** using **GrapesJS**, contributing to its design and initial implementation phase aimed at enabling intuitive customization and content management.
- Gained hands-on experience in a fast-paced startup environment, learning cross-functional collaboration.

Fullstack developer (Open Source)   Jan 2024 – Feb 2024
One Community Global   *Remote*

- Proactively initiated **bug fixes** and feature enhancements by **managing** and **reviewing** pull requests.
- Provided **management support** by overseeing team progress and facilitating weekly project updates.
- Reviewed and tested pull requests, ensuring code quality and functionality for an **open-source organization**.

PROJECTS

ContentCraft | *Next.js , Prisma, NeonDB, Stripe,ClerkAuth*   [Link](#)

- Designed and developed ContentCraft, a cutting-edge platform leveraging **GeminiAI** to generate tailored s**ocial media content ideas,** post descriptions, and relevant hashtags for platforms such as Twitter, LinkedIn, YouTube, Instagram, and TikTok.
- Implemented advanced search filters, **content history** management, secure authentication using **ClerkAuth**, and **Stripe integration** for payment processing, enhancing work efficiency and delivering a seamless user experience.

InfoFlowAI | *NextJS, Gemini API,PostgreSQL, VercelAI sdk, ClerkAuth,Stripe*   [github repository](#)

- Developed InfoFlowAI, integrating **PDFs into chat** applications for enhanced user productivity.
- Engineered seamless integration of **Gemini API** for intelligent, context-aware responses, and leveraged **Jina AI** to optimize PDFs into vector databases (**PineconeDB**), enhancing data accessibility and retrieval speed.
- Implemented **Next.js** and **TypeScript** for scalable, high-performance user interfaces.
- Orchestrated secure user authentication using **ClerkAuth**, coupled with **PostgreSQL** for structured data management, **Firebase** for scalable file storage, and **Stripe** for reliable payment processing.

SkillLancer | *MERN stack, Stripe*   [github repository](#)

- Developed a dynamic **Freelancing Web app**, SkillLancer, using the **MERN stack**, facilitating collaboration between sellers and buyers by providing a platform for posting and managing projects, exchanging services
- Engineered **distinct user accounts** with tailored features for sellers and buyers, including advanced search filters, enhancing user engagement and optimizing the service exchange process.
- Integrated **Stripe** for secure payment processing and implemented an advanced review system, enhancing transparency and trust within the platform.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, C++, Typescript, HTML, CSS
Technologies: ReactJS, Node.js, MongoDB, Express, NextJS, PostgreSQL, Flask
Developer Tools: Git, Visual Studio Code, PyCharm

AWARDS

- Ranked **770th** out of 34,000+ participants in **CodeKaze 2024**, an annual nationwide coding contest
- **Winner of PERIPHERATHON 1.0** for developing an innovative AI and IoT solution.
- **Runner-Up at Innovation Cup 2023** by AICTE-SPICES in the Transportation domain.
- Achieved **Division-level Chess player** status **5 times** with an online rating exceeding **1950 Elo**.
